Unified Investigations & Sciences acquires engineering firm Stephen Ternullo & Associates

DETROIT, June 18, 2015 – Unified Investigations & Sciences, Inc.—a subsidiary of Sedgwick Claims Management Services, Inc., and national provider of multidisciplinary engineering and forensic investigation services to insurance carriers, corporations and public entities—announced today that it has acquired Stephen Ternullo & Associates, a leading provider of structural engineering, forensic investigations and fire investigation services to the property and casualty insurance market and architects, developers and property owners in the Michigan region.

As part of the transaction, Steve Ternullo, president and principal engineer, was appointed district manager of Unified’s Great Lakes region, based in Clinton Township. All other employees of Stephen Ternullo & Associates will stay on with the combined organization.

“This acquisition enhances Unified’s diverse capabilities and forensic professional services,” said Unified President Steve Powell. “Joining forces with this team of engineers and experts represents an important, strategic opportunity to provide a broader range of engineering and forensic services in Michigan and across the Great Lakes region.”

“My team and I are excited to join the Unified organization,” Ternullo said. “Our service offerings and organizational cultures nicely complement one another. Together, we will offer the Great Lakes market an even greater depth of resources.”
